- *Can you easily meet college Principal/ Faculty?*

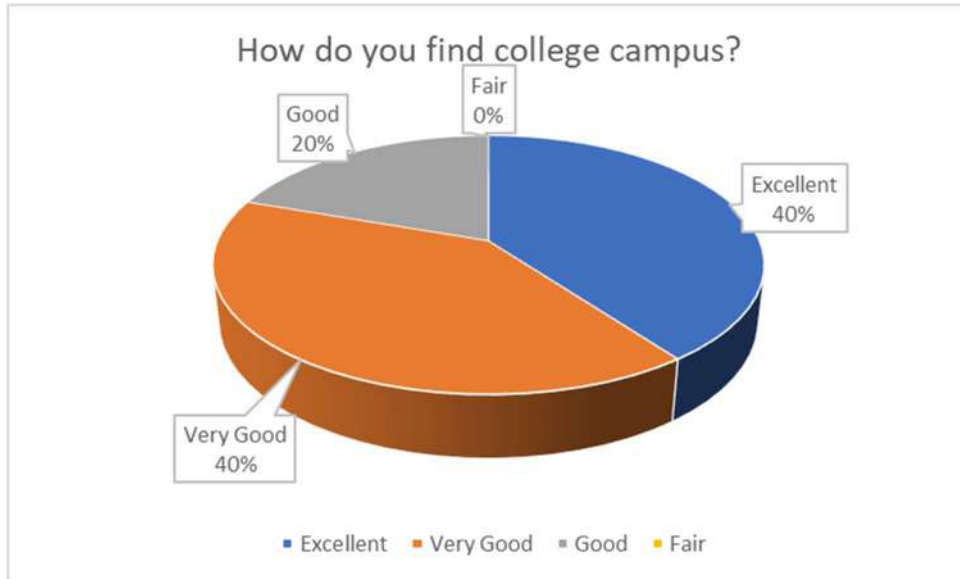

- Rank other facilities provided by college (activities, education, books, quality)

- Rank your child overall progress?

- *How do you find college campus?*

Year 2021-22

Analysis, Assessment and Action taken

In order to improve an institution's performance, feedback is essential. It gives staff and students a forum to express their opinions and discuss the institute's strengths and areas that still need work in order to thrive.

According to input collected from many stakeholders, most students thought the college's syllabus, lab and library facilities, drinking water, and general ambiance were in very good shape.

A few recommendations were made as well, though, such as updating library, hence number of books were also added to the library. Few suggested updating the website on regular basis. The IT committee received this information and the appropriate action was done additionally Facebook page and Instagram page was also under construction. A small number of students have also brought up the issue with the water in the restroom, which was mostly resolved by maintenance team.
