

**KRANTIGURU SHYAMJI KRISHNA VERMA KACHCHH
UNIVERSITY,
BHUJ.**

Year: 2023-2024

B.Sc (Honours) Geology

(With Research /Without Research)

Semesters : I

(Exit option)

FACULTY OF SCIENCE

SYLLABUS

**Curriculum as per UGC Guideline
Framed according to National Education Policy (NEP) - 2020
With effect from June – 2023 (and thereafter)**

B.Sc. (Honours) Geology Programme

(With Research/without Research)

NEP-2020

With effect from June – 2023 (and thereafter)

FACULTY OF SCIENCE

Subject: GEOLOGY

B. Sc. Semesters: I

**NATURE AND EXTENT OF BACHELOR'S DEGREE PROGRAMME IN
GEOLOGY HONOURS)**

A bachelor's degree in Geology with Research or without Research is a 4 year degree course which is divided into 8 semesters.

Sl.No.	Type of Award	Stage of Exit	Mandatory Credits to secure Degree Award
1	Certificate in the Discipline	After successful completion of 1st Year	
2	Diploma in the Discipline	After successful completion of 1st and 2nd Years	
3	B.Sc. in Geology	After successful completion of 1st, 2nd and 3rd Years	
4	B.Sc. (Honours with Research/without Research) in Geology	After successful completion of 1st, 2nd, 3rd and 4th Years	

A student pursuing 4 years undergraduate programme with research in a specific discipline shall be awarded an appropriate Degree in that discipline on completion of 8th Semester if he/she secures required Credits. Similarly, for certificate, diploma and degree, a student needs to fulfill the associated credits. An illustration of credits requirements in relation to the type of award is illustrated as above.

Bachelor's Degree (Honours) is a well-recognized, structured, and specialized graduate level qualification in tertiary, collegiate education. The contents of this degree are determined in terms of knowledge, understanding, qualification, skills, and values that a student intends to acquire to look for professional avenues or move to higher education at the postgraduate level.

Bachelor's Degree (Honours) programmes attract entrants from the secondary level or equivalent, often with subject knowledge that may or may not be directly relevant to the field of study/profession. Thus, B.Sc. (Honours) Course in Geology aims to prepare students to qualify for joining a profession or to provide development opportunities in particular employment settings.

AIMS:

1. To develop the curriculum for fostering subjective-learning.
2. To adopt recent pedagogical trends in education including e-learning, flipped class, hybrid learning and MOOCs
3. To shape students as a responsible and sensible citizen.
4. To offer an environment that guarantees intellectual development of students in an all-inclusive manner.
5. To provide updated subject matter theoretically and practically which can enhance student's core competency and learning.
6. To mould a responsible citizen who is aware of most basic domain-independent knowledge, including critical thinking and communication.
7. To enable the graduate to prepare for national as well as international competitive examinations, especially, IIT-JAM, UGC-CSIR NET, CUCET, GATE, GPSC, and UPSC Civil Services Examination.

COURSE INTRODUCTION

The redesigned curriculum of B.Sc. in Geology offers essential knowledge and technical skills to study earth in a holistic manner. Students would be exposed to different areas of earth science using a unique combination of core, elective and vocational papers with significant inter-disciplinary components. Students would be taught modern methods and technologies to understand dynamics of earth system & tectonics, minerals & rocks, geomorphology, stratigraphy, fossils science, natural resources and its exploration techniques etc.

The entire programme of B.Sc. Geology will include classroom theories as well as practical field and laboratory component. The programme will also have field visits, study tours, outstations and field activities and projects as part of their curriculum.

Programme outcomes (POs):

Transformed curriculum shall develop educated outcome-oriented candidature, to develop into responsible citizen for nation-building and transforming the country towards the future with their knowledge gained in the field of earth science.

Programme specific objectives (PSOs): B.Sc. I Year Certificate Course in Geology

- ✓ This course will enable students to learn avenues in Geology.
- ✓ The first-year syllabus can help students to get ready for competitive exams.
- ✓ Students will be able to know about the basics of earth system science (i.e. formation of earth, its internal structure, atmosphere, and hydrosphere).
- ✓ Certificate and diploma courses are framed to generate self- entrepreneurship and self- employability, if multi exit option is opted.
- ✓ Students will increase the ability of critical thinking, reasoning and curiosity, development of scientific attitude, problem solving, improve practical skills, enhance communication skill, social interaction, and increase awareness in the field of earth science and environment.
- ✓ The training provided to the students will make them competent enough for doing jobs in Govt. and private sectors of academia, research and industry at entry level.

TEACHING LEARNING PROCESS

Teaching and learning in this programme involve classroom lectures as well tutorials.

It allows-

- Closer interaction between the students and the teacher as each student gets individual attention.
- Preparation of assignments and projects submitted by students
- Project-based learning
- Group discussion
- Home assignments
- Quizzes and class tests
- PPT presentations, Seminars, interactive sessions
- Co-curricular activity etc.
- Study Tour or Field visit

EVALUATION METHODS:

Academic performance in various courses *i.e.* **Major, Minor, IDC/MDC, AEC, VAC** and **SEC** are to be considered as parameters for assessing the achievement of students in the subject. A number of appropriate assessment methods of Geology will be used to determine the extent to which students demonstrate desired learning outcomes.

Following assessment methodology should be adopted:

1. The oral and written examinations (Scheduled and surprise tests),
 2. Field learning of students
 3. Problem-solving exercises,
 4. Practical assignments and laboratory reports,
 5. Observation of practical skills,
 6. Individual and group project reports,
 7. Efficient delivery using seminar presentations,
 8. Viva voce interviews are majorly adopted assessment methods for this curriculum.
 9. The computerized adaptive testing, literature surveys and evaluations, peers and self-assessment, outputs from individual and collaborative work are also other important approaches for assessment purposes.
 10. A student shall be evaluated through Comprehensive Continuous Assessment (CCA)/ (***Internal Evaluation***) as well as the **End of Semester examination (*External Evaluation*)**. The weight-age of CCA shall be 50%, whereas the weight-age of the Semester end examination shall be 50%.
 11. The **End of Semester examination (*External Evaluation*)** shall have an assessment based upon following perspective with respect to all the courses:
 - a. Evaluation with respect to Knowledge,
 - b. Evaluation with respect to Understanding,
 - c. Evaluation with respect to Skill,
 - d. Evaluation with respect to Application and
 - e. Higher Order Thinking Skills.
- The End of Semester Examination will be conducted by the University. A certified journal of the respective practical course must be produced at the time of practical examination by the student. The Field Excursion is highly essential for studying

ological features. There shall be at least one field Excursion (local or outstation).

- This is compulsory to record laboratory work in the Journal. Certified journal has to be produced while appearing at the time of Practical examination

Year	Semester	Course Code	Paper Title	Credits	Marks		Total

Structure of the Question Paper for the University Exam

KSKV Kachchh University: BHUJ

FIRST YEAR B.Sc.: GEOLOGY THEORY (MAJOR/MINOR/MDC)

Total Marks: 40, Duration: 2 hours 30 min

Passing standard: 16 Marks

PATTERN OF QUESTION PAPER

FOR SEMESTER-END EXAMS (Sem I & II)

Questions	Section	Marks
Question – 1 Unit – 1	2 Questions of 10 Marks, student have to attempt any 1	10 marks
Question – 2 Unit –II	–do–	10 marks
Question – 3 Unit – III	–do–	10 marks
Question – 4	12 short questions of 1 mark, 4 questions from each unit and the students have to attempt any 10.	10 Marks

- Types of questions for Question 4 may be varied like: one-line answer / two-line answers / definitions / reasoning / drawing small figures/ label the figure / one word answer / match the pairs etc.

KSKV Kachchh University, Bhuj - Kachchh
(Effective from June 2023-24 UNDER NEP-2020)

SEMESTER 1:

Paper GEO-101: Elementary Earth Science
(Course code: GEO-101) Credit: 3

Course Outcome

After the completion of the course the students will be able to:

1. The course enables the students to understand the scope and application of Geology and gives them the confidence to go to the next level of learning in the subject.
2. It aims to provide adequate basic knowledge about origin and age of our Solar System and planets including earth and its different layers.
3. Students will be able to understand the Internal Structure of Earth, its temperature and Pressure conditions within the interior of the earth.
4. Course will help students to understand the basics concept of plate tectonics and dynamics of earth.
5. Students will learn and understand the relation of ocean circulation with respect to celestial bodies, oceanic tides and waves.
6. Strengthening understanding of atmosphere and its structure.
7. Develop skills of presentations and narration using computer & multimedia.

SEMESTER 1:
Paper: MAJ GEO-101: Elementary Earth Science
(Course code: MAJ GEO-101) Credit: 2

<i>GEOLOGY SPECIFIC CORE COURSE</i>							
<i>COURSE</i>	<i>SEMESTER</i>	<i>COURSE CODE</i>	<i>COURSE TITLE</i>	<i>THEORY</i>			
				<i>Credits</i>	<i>Lectures</i>	<i>External</i>	<i>Internal</i>
<i>Certificate Course</i>	B.Sc.-I	MAJ GEO-101	<i>Elementary Earth Science</i>	3	45	40 Marks	35 Marks
<i>UNIT</i>	<i>TOPIC</i>						<i>No. Of Lectures (45 hrs)</i>
Unit 1	Solar system and Earth: <ul style="list-style-type: none"> • Introduction to earth science, branches and its scope. • General characteristics and origin of the Universe. • Solar System and its planets, Meteorites and Asteroids • Earth in the solar system - origin, size, shape, mass, density, rotational and revolution parameters. • Concept of earth's orbit with time and seasons 						15
Unit 2	Earth and its internal structure <ul style="list-style-type: none"> • Structure of Earth's Interior. • Introduction to seismic waves and evidences of internal structure of earth from Seismology. • Introduction to crust, mantle and core. • Density, Temperature and Pressure condition of rocks in the interior of the earth. 						15
Unit 3	Age of earth and Plate tectonics <ul style="list-style-type: none"> • Age of earth; Relative Methods -Sedimentation, Salinity method, Rate of cooling of earth. Radiometric dating method. • Basic concept of Plate Tectonics, Sea floor spreading and continental drift. • Introduction to Plate boundaries. 						15

Suggested readings

- Holmes' principles of physical geology, Arthur Holmes.
- Savindra Singh., (2008). Physical Geography. Prayag Pustak Bhawan.
- Robert H. Stewart, (2008), Introduction to Physical Oceanography.
- A Text Book of Geology, P. K. Mukerjee, World press.
- Principles of Engineering Geology, K.M. Banger, 2018, Standard Publisher.

Note: Students may refer variety of material available online and on web resources for further understanding.

(Effective from June 2023-24 UNDER NEP-2020)
SEMESTER 1:
Paper MAJ GEO-102-P: Elementary Earth Science

Practical/ Lab course (Course code: MAJ GEO-102-P)
Credit: 1

Course Outcome

After the completion of the course the students will be able to:

1. Basic understanding of the major tectonic plates.
2. Develop skills to identify major oceanic boundaries, and oceanic currents.
3. Learn observational skills to understand eclipses and tidal mechanism and demonstrate the same in journals and exams.
4. They will learn preparing small reports and field observations at first year basic level.

<i>DISCIPLINE SPECIFIC CORE COURSE</i>						
<i>COURSE</i>	<i>SEMESTER</i>	<i>COURSE CODE</i>	<i>COURSE TITLE</i>	<i>PRACTICAL</i>		
				<i>Credits</i>	<i>Lectures</i>	<i>INTERNAL/ External</i>
<i>Certificate Course</i>	B.Sc -I	MAJ GEO-P-102	Elementary Earth Science	1	30 hrs	25 (15+10) Marks

Practical 1: Study of major plates of World

Practical 2: Understanding plate motions for major plates.

Practical 3: Study of eclipse.

Practical 4: Calculation of sea floor spreading rate.

Practical 5: Demarcation of internal structure of earth with discontinuity.

Note: Additional practical related to syllabus may be included during class work.

Journal / Submission

- Note: It is compulsory to record laboratory work (all the practicals) in the journal. The journal is to be certified by the incharge teacher and the Head of the Department within time frame. Certified journal must be produced while appearing at the time of Practical examination.
